9. Adding Game Methods

There are many ways to copy games:

The First Type: (compatible with multiple win systems)

Insert the game console memory card into the computer and use DiskGenius software:

- (1) Open DiskGenius, make sure DiskGenius has recognized the memory card ;
- (2) Find the rom folder and put the game in the corresponding folder ;
- (3) Drag the game that needs to be placed directly into the corresponding folder ;
- (4) Safe pop-up after transmission.

The Second Type:

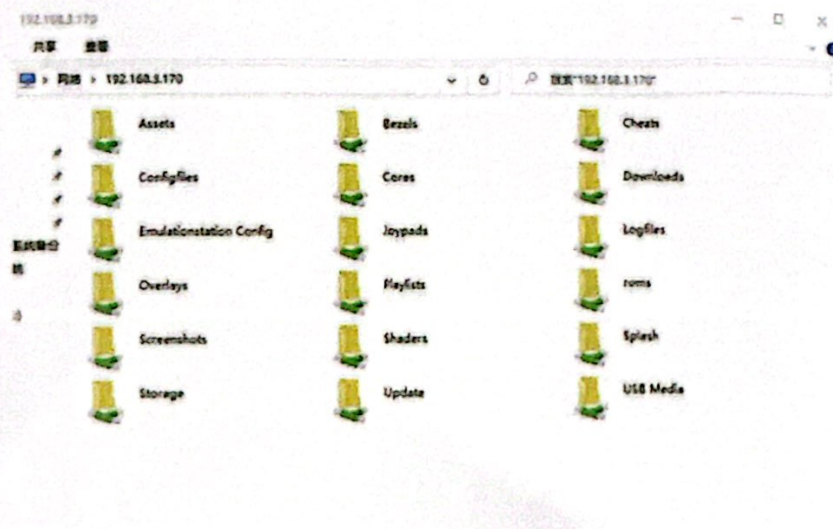

The second way, if you use the memory card equipped with the game console, you can directly insert it into the win10 computer,

find the data mobile hard disk, and directly copy the game to the corresponding emulator in the roms folder.

The Third Type: (network connection)

- (1) Please connect the device to the network first.

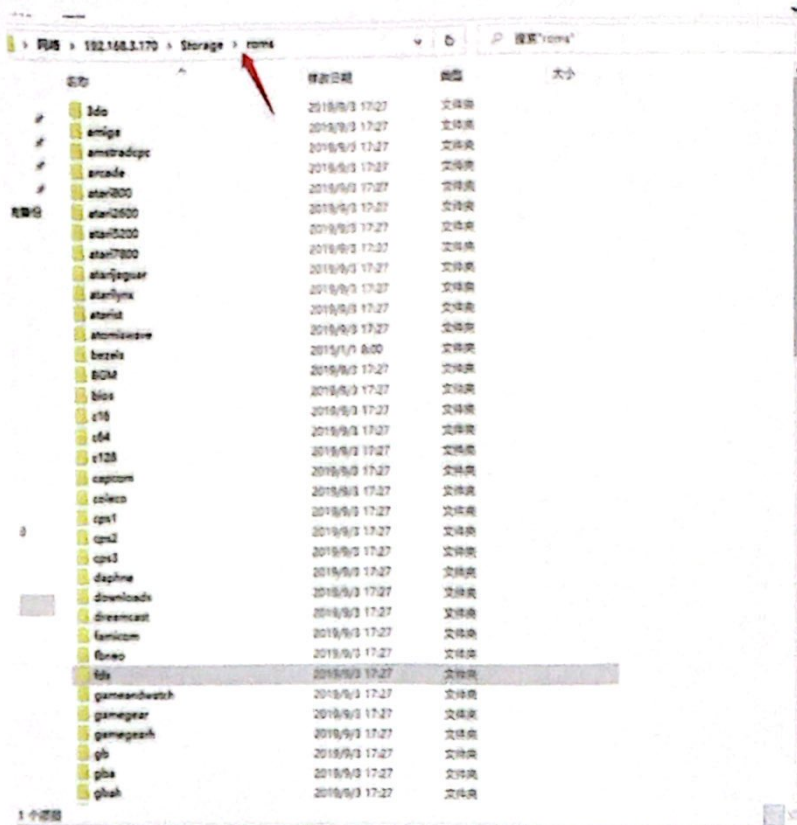

In the example below, the IP address is: 192.168.3.170. In the computer resource manager, enter \\192.168.3.170 and press Enter.

If prompted to enter a user name and password, the default user name: root, password: emuelec.

- (2) Open the Storage/Roms Folder:

You can see many sub folders, each of which corresponds to a simulator game, and the corresponding game needs to be placed in the corresponding folder to be correctly identified

(3) Example of the folder list corresponding to the simulator:

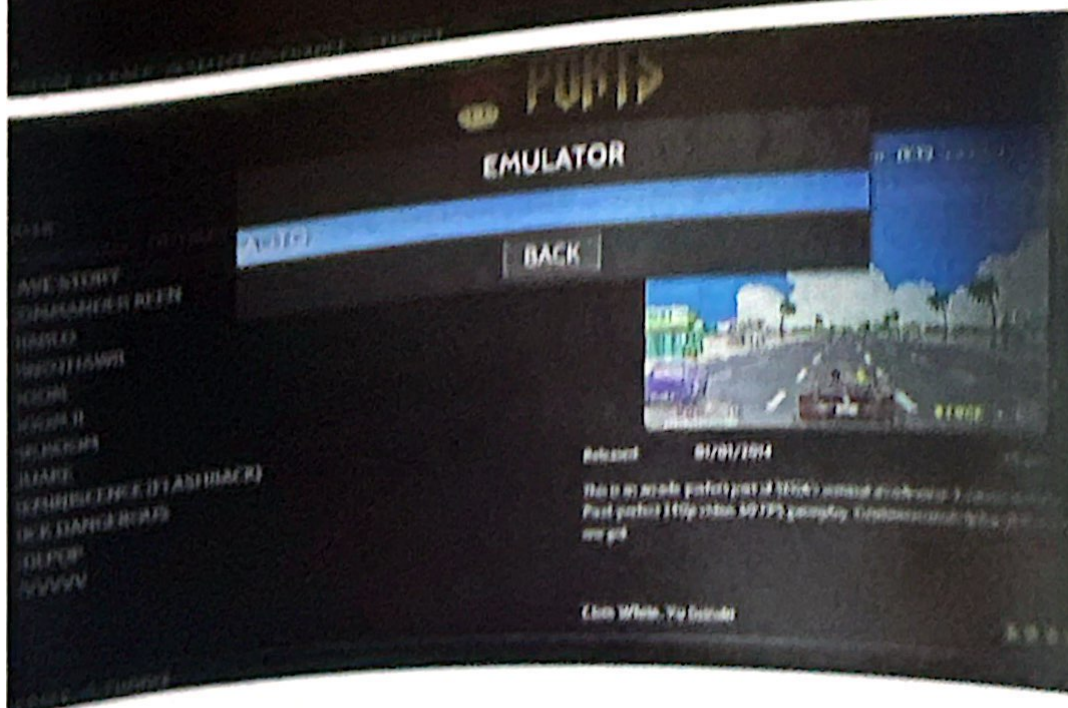

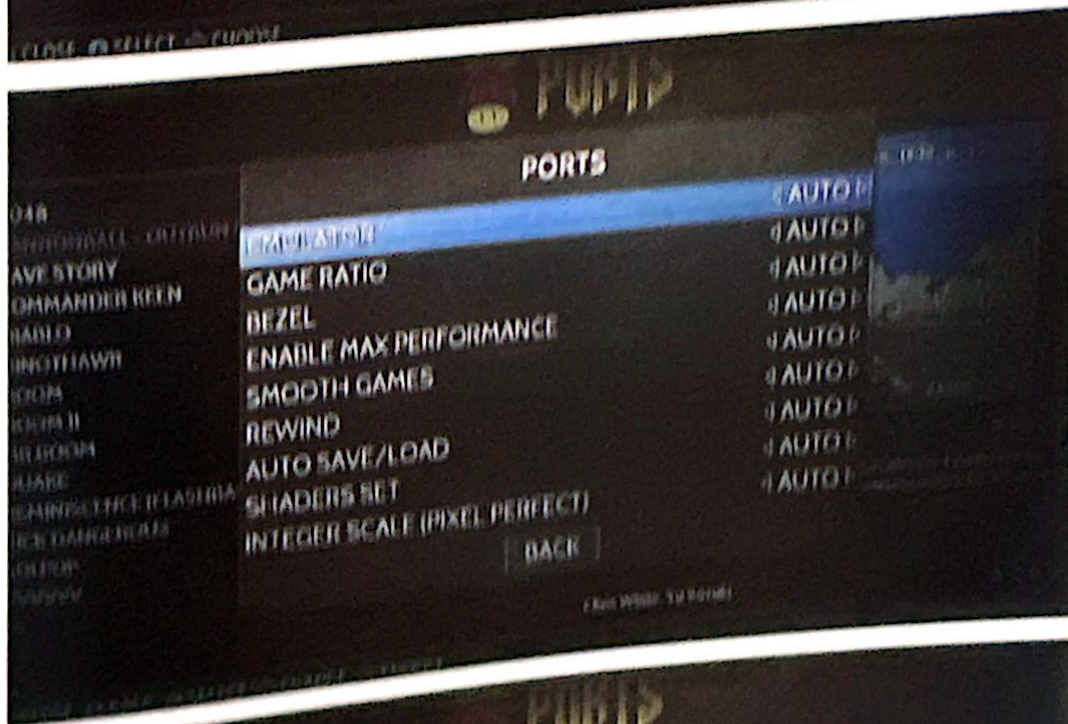

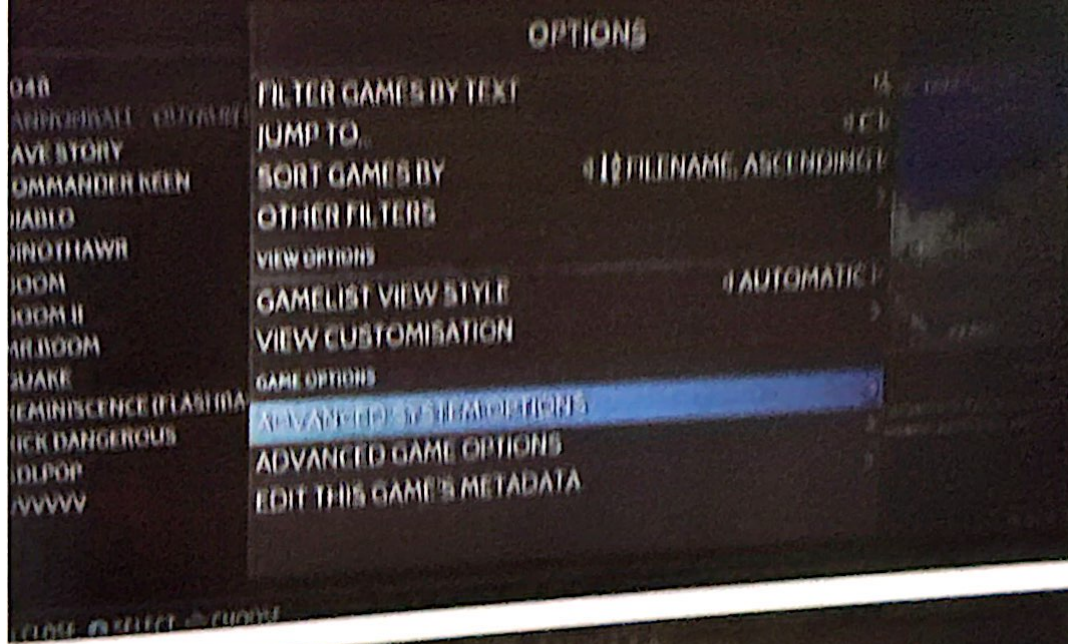

Arcade-FBA format	roms\arcade\fba
Arcade-MAME format	roms\arcade\mame2003
SNES	roms\nes
PSP	roms\psp
PS1	roms\psx
NES/FC	roms\nes
...	...

Note: The system distinguishes games by folder name, do not modify any directory structure, just copy the game files to the folder of the corresponding simulator.

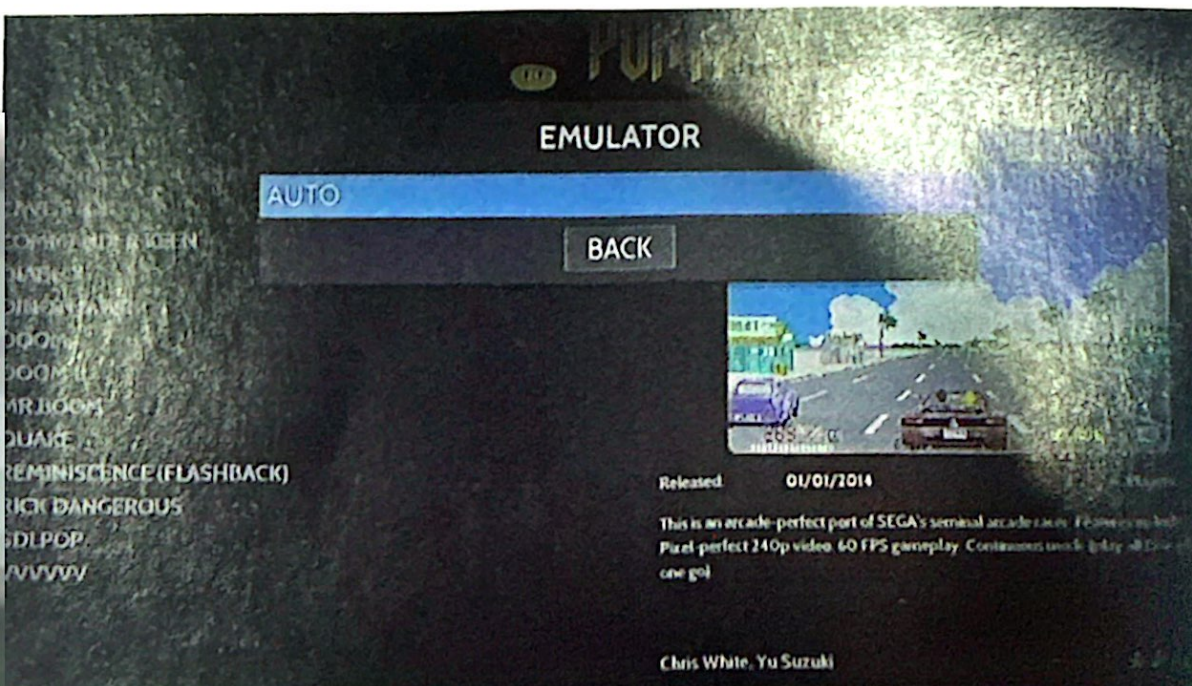

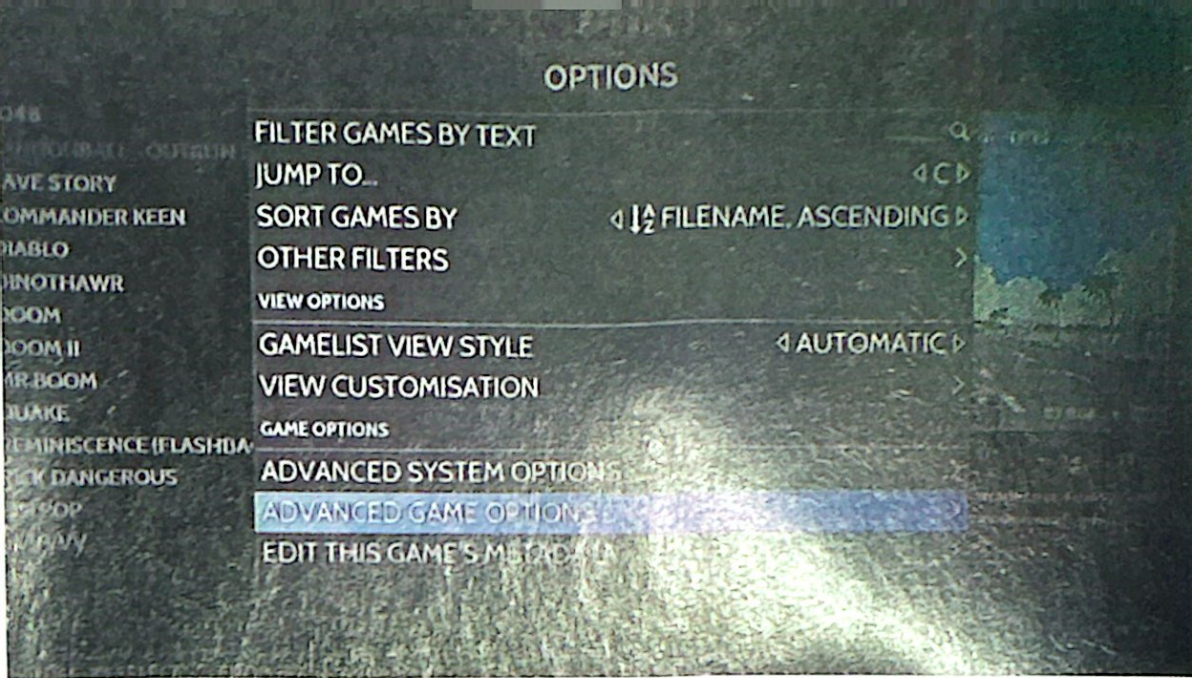

10. Change Game Emulators:

There may be multiple simulator files. If individual games cannot be opened or you want to try the effects of other simulators, please use the following methods to change the simulator:

Choose to change the rom file of the simulator; Press SELECT to enter the game settings options (options) --->>game options--->>advanced system options, this option can set the default emulator of all roms in the folder;

Select advanced game options, which can set the emulator of the selected game;
